realistic 90d upside*

*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1 Reduce the nightly rate from £181.8 (18% above the cohort median of £154.60) to around £155 to align with market pricing and lift the 22.8% occupancy toward the city median of 47.8%.
- 2 Add and list high-value outdoor amenities on the deck (e.g., comfortable seating, a small BBQ, fire pit) to address the missing Outdoor category and justify a premium price.
- 3 Upload a full set of at least 10 professional photos covering bedroom, bathroom, kitchen, and the deck, then set the deck view as the lead photo to improve visual appeal and click-through rates.
