realistic 90d upside*

*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1 Reduce the nightly rate from £353.6 (129% above the market median of £154.6) to around £180-£200 to align price with demand and boost occupancy.
- 2 Correct the title to reflect the true capacity (4 guests) and highlight the 2-minute walk to the NEC, eliminating the misleading "6-Person Suite" claim.
- 3 Add and prominently list high-value amenities—outdoor space, parking, and entertainment—to match guest expectations and improve the amenities score.
