*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1** Rate is £60.40 below the £154.60 market median but occupancy (26.1%) remains nearly 50% lower than city average (47.8%)
- 2** Title exceeds 50 characters (actual length=47) with poor SEO by not prioritizing '2-Bed' and 'Garden' in optimal positions
- 3** No explicit confirmation of core amenities like WiFi, TV, or laundry despite being implicitly necessary for 4-guest occupancy

Cover photo strategy

Display the garden view as cover photo since it's a key differentiator explicitly mentioned as available and highly valuable in listings lacking outdoor space. The garden's presence is rarely advertised in competitors, making it a strong visual hook.
