realistic 90d upside*

*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1 Nightly rate is +802% above cohort median (£1394 vs £155) while occupancy is 29.3% booked vs cohort median 47.8% - classic price/occupancy imbalance for luxury listings
- 2 4.93 rating from only 15 reviews provides limited social proof for premium price
- 3 No amenities listed despite 4.93-star rating - guests can't validate features that justify cost

Amenity gaps guests filter for

- Outdoor spaces with city views
- Secure on-site parking
- High-speed Wi-Fi connectivity

Cover photo strategy

Lead with the outdoor space photo if available, as it shows our prime location advantages which justify the premium price point. Outdoor images consistently drive higher engagement in high-end listings.
