*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1 Property price is £851.40 above median cohort rate but only 32.6% occupancy vs median 47.8% (15.2% booked in next 90 days) creates pricing occupancy paradox
- 2 0 listed amenities vs high-end market's top 3 priority categories: Outdoor, Parking and Entertainment
- 3 Title fails to emphasize key differentiators - only mentions bedroom sizes without highlighting 4-guest capacity or proximity to transport
