*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1** Your nightly rate (£126.8) is +21% above the market median (£104.90) while you already enjoy 68.5% occupancy (vs. cohort median 48.9%); a price optimisation audit could unlock extra revenue.
- 2** Add a washing machine (currently missing) to appeal to families and longer stay guests, addressing a key amenity gap that competitors in the cohort often provide.
- 3** Reorder photos to lead with the patio/BBQ image and ensure each room (bedrooms, kitchen, living area) is represented; your photo count (21) is below the median (23) and current coverage is unclear.
