*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1 Nightly rate is +1000% above cohort median (£1,700 vs £154.60) while occupancy suggests price sensitivity (92.4% booked vs 47.8% median)
- 2 Description lacks specific features to justify premium pricing - includes 0/3 of high-value amenity categories (Outdoor, Parking, Entertainment)
- 3 Title doesn't leverage 5.0 rating or occupancy proof despite being 18x more booked than average local listing
