*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1 Rate is only +5% above the cohort median (£162 vs £154.60) while occupancy is at the median (47.8% booked), indicating price isn't the barrier—lowering the nightly rate a few pounds could unlock the 47 open nights and boost bookings.
- 2 The current title is cluttered and lacks high-impact keywords; replace it with a concise, SEO-friendly version that highlights the 6-car driveway and entertainment features.
- 3 The listing has no description; add a 200-300-word compelling narrative that repeats the key facts (capacity, rate, rating, amenities) and appeals to family travelers.
