*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1 Occupancy is low: only 31.5% booked in the next 90 days, leaving 62 open nights and up to ~£3,195 realistic upside of potential revenue unfilled.
- 2 No high■impact amenities listed; adding outdoor space, parking, or entertainment options could attract more bookings in Leeds.
- 3 Photo count is unknown and likely insufficient; adding professional shots of every room and setting the living■room view as the cover can raise interest.
