*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

What's holding you back

- 1** Title mismatch: the title claims "sleeps 6" while the listing capacity is only 4 guests – correct this to avoid confusion and align with the actual occupancy limit.
- 2** Missing high-value amenities: no parking or outdoor space is listed; adding a dedicated parking spot and highlighting any private patio can tap into guest preferences and boost appeal.
- 3** No photos listed: the listing likely has zero images; add at least 12 high-quality photos (living room, bedroom, kitchen, bathroom, and any outdoor area) with the bedroom as the lead photo to improve visual engagement.
