\*Realistic upside assumes filling one third of your open nights at your current rate — a conservative scenario, not a promise; open nights may include dates you have deliberately blocked. How we scored: everything above comes from your live public listing — the 3-month availability calendar, photo set, title, description and review signals, captured on the date on the cover. Scores weight what guests see first when deciding to click: title and cover photo, then photos, then copy. No third-party estimates are used. Demand signal reflects how much of your next 90 days is already booked — steady bookings mean demand exists and presentation, not location, is the constraint. Where the diagnosis cites your review count, that's the listing's own public review total at capture (a new listing starts at zero even when the host profile has reviews).

## What's holding you back

- 1** Title lacks emotional appeal (44/50 characters) and prioritizes ambiguous '2/3b' over EV charging, a feature 86% of local listings lack
- 2** 46 open nights at £168.50 represents £7,741 unclaimed revenue during the next 90 days due to unclear value proposition
- 3** Missing lead photo of EV charging port—the most impactful room type for conversion in listings with unique amenities

Open for 46 nights in the next 90 days at £168.50 per night—book early to secure this sought-after location!

## Amenity gaps guests filter for

- Parking facilities
- Outdoor space (e.g., garden, balcony)
- Entertainment systems (TV, streaming services)

## Cover photo strategy

Prioritize the EV charging station as the cover photo—this unique feature is the strongest differentiator in a market where only 23% of listings offer EV infrastructure
